HALIFAX, N.S.

GOOD TEETH.

GOOD HEALTH is everybody's prime capital. No health, and no matter how wealthy, means misery. Health depends upon certain conditions. The chief foundation of health is a perfectly acting digestive system. Good digestion greatly depends on good, sound, and well cleansed teeth; teeth that will grind and pulverize our food, and start it on the way to the stomach duly and properly prepared for the active service of that industrious organ. A wonderful amount of comfort and pleasure depend upon the possession of a good set of teeth, and on the other hand, a great amount of discomfort and misery is caused by bad teeth. To keep the teeth sound when good, and to preserve them in as good condition as possible when beginning to fail and decay, is the duty of every-body, and numberless have been the means used to accomplish that desired end. Many preparations have been offered for cleansing the teeth, and to keep them looking well. Many of these have been very successfully used for that purpose, and many more have been extremely deleterious, and while they perhaps kept the teeth looking nice for a while were utterly destructive to them. There are several qualifications which a good preparation for the teeth should have. It should cleanse the teeth from all foreign matter, it should preserve them and the gums by keeping them healthy, it should be pleasant to the taste, and refreshing to the mouth; above all it should not contain anything which would have the slightest tendency to destroy the enamel or injure the teeth or gums in any particular. It is comparatively easy to make a preparation to cleanse the teeth, but more difficult to make one that will not only cleanse but actually be a benefit to them, and again more difficult still to combine cleansing and preserving properties with fragrant and refreshing, cooling and pleasing qualities.

As all people do not like the same food because of the taste, so all people do not like the same tooth preparation because of the flavor. To meet the requirements of all, we have, after much experimenting, succeeded in making a Tooth Powder having all the necessary qualities—cleansing, preserving, healing, cooling, fragrant, healthful and delightful, to which we have given the name **"ROSODENTINE."**

We are also selling the liquid Tooth Preparation, **Pearlodent** introduced to the public some years ago, and which has such an extensive sale. For those who prefer a liquid Tooth Wash, we can recommend this as being all that is desirable.

WE ABSOLUTELY GUARANTEE our Tooth Preparations to be non-injurious.

ORDNANCE DRUG STORE,

W. H. SIMSON, Halifax, N.S.

HALIFAX, February 15th, 1898

DEAR FRIENDS,—

On again greeting you with our **ANNUAL CATALOGUE OF SEEDS** we desire to thank you for past favors which have been shown to us by greatly increased sales, proving that our efforts to please, by keeping only Reliable Seeds, have been fully appreciated. As is our habit, we have taken the greatest possible care as to the quality of our Seeds, which embrace a large variety and many novelties. Our Seeds are only purchased from the most reliable houses, and are thoroughly tested before being offered for sale. But while this is the case, for obvious reasons, we cannot under any circumstances guarantee the Seed, nor be responsible for the crop. All seeds purchased from us must be accepted on these terms.

Persons sending us orders by Letter, Telephone or otherwise will have their wants attended to with the greatest despatch.

Our Seed business being a cash one, we would ask our friends to accompany their orders with the money.

ORDNANCE DRUG STORE,

W. H. SIMSON, PROPRIETOR.

Discounts.

When order is accompanied with cash, we Prepay the Postage or Express on all Seeds ordered by the $\frac{1}{4}$ pound, the ounce or packet, prices of which are given in this Catalogue. When ordered at *Pound Rates*, 4c. per lb. must be added if wanted to be sent by mail, otherwise we will deduct cost of postage from goods ordered, or express same at purchaser's cost.

In order to make it an object for neighbours to club their orders together, we offer the following inducement on Vegetable and Flower Seeds in packets, the postage of which we prepay to any address in the Dominion.

Purchasers remitting \$1.00 may select Seeds amounting to \$1.20

❧VEGETABLE SEEDS❧

GENERAL LIST.

The Novelties of the Season and our Specialties will be found in the Body of the Catalogue, printed in bold type.

ASPARAGUS.

One ounce of seed will sow about 40ft. of row. A bed 12 x 40 ft. requires 100 plants, and is sufficient for a small family. 7500 roots will plant one acre.

COLUMBIAN MAMMOTH WHITE.

	oz.	pkt
Columbian Mammoth White —A new and distinct variety producing white shoots of the Conover's size. The plant, however, is more robust and vigorous than the other giant varieties.....lb. 60c.	10	5
Paimetta —This grand American variety grows to an immense size. The heads are green without any purple tinge whatever, and of excellent flavour and tenderness.....lb. 60c.	10	5
Giant Purple Top —The variety generally grown.....lb. 60c.	10	5
Conover's Colossal —Grows very large, often producing stems 3 and 4in. in circumference; very tender.....lb. 60c.	10	5
Asparagus Plants —2-year old plants of the three last named supplied at \$1.50 per 100.		

ARTICHOKE.

The seed should be sown as early as the weather will permit, in drills. Succeeding spring, transplant to permanent beds, in rows 3 feet apart and 2 feet between plants.

	oz.	pkt.
Green Globe	40	5
Purple Globe	40	5

BEANS—Pole or Running.

One pound will plant about 100 hills.

	Per lb.
Cuban Asparagus (yard long).....	25
Vair's Asparagus —Probably the finest pole bean in cultivation. Pods long and exceedingly tender.....Pkt. 10c.	50
Creaseback —A fine old variety.....	17
Lazy Wife's —Green pods, quite stringless, rich buttery flavour.....	17
Early Golden Cluster —The earliest Wax pole bean in cultivation. Pods 6 to 8 in. long.....	20
Black Butter, or Indian Chief —Waxy yellow pods; very tender in texture and fine flavour.....	20
Cranberry, or Horticultural —A well-known productive variety.....	20
Dutch Case Knife —Very productive and one of the earliest.....	15
Lima, Large White —This delicious bean, either in its green or dry state, is universally acknowledged the best of the bean family.....	20
Scarlet Runners { Mainly cultivated for their flowers, but the pods are also used as a culinary vegetable. }	17
White " }	
Painted Lady " }	

BEANS—English.

Sow in drills two feet apart, and leave 5 or 6 inches between plants. One pound of seed will sow 100 feet of row.

	Per lb.
Giant Harlington Windsor —A highly esteemed variety in England, and much superior to Broad Windsor.....	25
Broad Windsor —Very large, remains long fit for use.....	20
Wait's Improved Early Long Pod	20
Mazagan	20

OBSERVE—Our Prices include postage

IMPROVED GOLDEN WAX.

BEANS—Dwarf or Bush.

One pound of Beans will plant 100 feet of row. One bushel will plant a half acre in drills.

YELLOW PODDED WAX BEANS.

- | | Per lb. |
|---|---------|
| Improved Golden Wax (<i>Rust Proof</i> .) The standard variety for general use; pods long, nearly straight, broad, flat, golden yellow, fleshy and wax-like; of the highest quality..... | 12 |
| Currie's Rust Proof —Bean when ripe resembles the Black Wax. It is, however, much more vigorous and productive. A fine marketing variety | 10 |
| Yosemite Mammoth Wax —This distinct and remarkable new variety has been so named on account of its enormous size. The pods frequently attain a length of 10 inches, are round and nearly all solid pulp, are bright yellow in colour, absolutely stringless, and are born in great profusion | 18 |
| New Golden Eye Wax —This new strain of Golden Wax is claimed to be rust proof. It possesses all the good points of the old variety, but is larger in pod and much more prolific..... | 10 |

Wardwell's Kidney Wax—This variety is one of the finest dwarf beans in cultivation, and possesses the merits of earliness, hardness and productiveness, combined with clearness of pod and excellent quality, and has as yet been free from rust, as far as our experience goes..... 10

Detroit Wax—This is a variety of great merit. Is ready to pick a few days later than Wardwell's. Pods round, extremely tender and of a beautiful clear colour..... 10

Golden Wax—A distinct variety of strong growth, and a week earlier than Black Wax..... 10

Crystal Wax—Bean white when ripe, a well known variety.... 15

GREEN PODDED VARIETIES.

- | | |
|--|----|
| Extra Early Refugee —Similar to the old Refugee bean, but two weeks earlier. Very productive and pods have a beautiful silvery green colour..... | 12 |
| Burpee's Bush Lima —An improved variety of this class. Beans as large as the Pole Lima, and two weeks earlier..... | 20 |
| Early Red Valentine —Very desirable for marketing or family use. Early, productive, tender and fine flavour..... | 12 |
| Wonder of France —Very prolific and fine flavour; beans retain their bright green colour when cooked. It is an excellent shelled cooking bean. Improved French stock..... | 25 |
| Early China | 10 |
| Yellow Six Weeks | 10 |
| Improved Yellow Eye or Boston Favourite | 12 |
| Early White Marrowfat | 10 |
| Large White Kidney , a superior shelled bean..... | 10 |

BEETS.

One ounce will sow about 50ft. of drill; 5 lbs. will sow an acre.

HALF LONG AND LONG VARIETIES.

(Quarter pound at pound rates.)

	Lb.	oz.	pk.
BONSECOUR MARKET, Half Long —Without exception the best and in every way the most satisfactory Beet in cultivation. Good colour, fine flavour, clean and regular	\$0 75	10	5
Dell's Superb Black —Dark red coloured root; not large, but fine flavour; splendid dark ornamental foliage	1 00	10	5
Long Blood —The heaviest cropper, fine quality	45	10	5

TURNIP VARIETIES

Columbia —This new Turnip Beet is earlier than the Eclipse and of much better quality. Handsome foliage and neat uniform roots	75	10	5
Lentz —An extra early Turnip Beet with a very small top, producing a crop in six weeks from time of planting. It keeps well and is productive	60	10	5
Crosby's Early Egyptian —An improved strain of the Egyptian Beet. Much thicker than the original strain, quite as early, smoother and of better colour and quality	60	10	5
Eclipse —A splendid round variety, dark red and fine quality	50	10	5
Egyptian Turnip —Very smooth and early good quality, dark red colour	50	10	5
Early Crimson Turnip —Early and tender.	50	10	3
Flat Bassano —Very tender, suitable for shallow soils	50	10	5

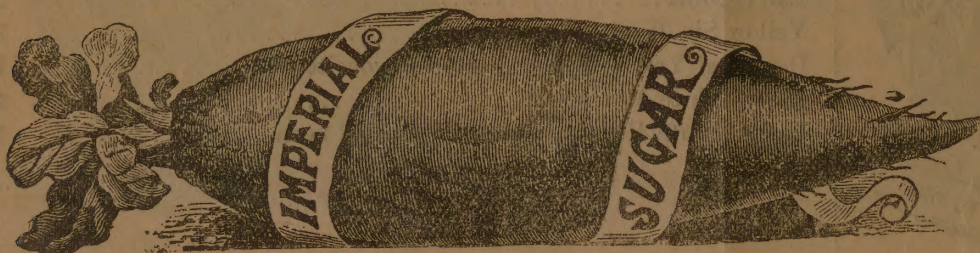

SUGAR BEET.

Four pounds will sow one acre.

	Lb.
Imperial White Sugar —Grows to a good size, best variety for stock feeding	20
Red Top White Sugar —Smaller than the preceding, but richer in sugar	25
Yellow Sugar —A very rich variety	25

BONSECOUR MARKET BEET

BEET--Stock Feeding Varieties.

MANGEL WURZELS.

OUR PRICES INCLUDE POSTAGE

FOUR POUNDS WILL SOW ONE ACRE.

Mammoth Long Red—Best for general crop.....	Lb. 20
Mammoth Golden Giant.....	20
Golden Tankard.....	25
Champion Yellow Globe.....	20
ERFURT MODEL—A superior new variety, rich dark yellow.	
Very clean grower, with little top.....	25
Norbital Giant—Long red.....	20
GATE POST YELLOW—Pronounced by British farmers the most useful mangel grown. It is probably the best Yellow Mangel. Fine clean heavy roots.....	
Long Red.....	18
Long White.....	20
Waite's Red Tankard.....	20
Long Yellow.....	20
Red Globe.....	20

BORECOLE, OR KALE.

Sow early in spring. Cultivate same as Cabbage.

	oz.	pkt.
Tall Green Curled Scotch.....	15	5
Dwarf Green, Curled German.....	15	5
Tall Moss Curled.....	15	5

BRUSSELS SPROUTS.

Dwarf Paris Market—A superior variety in every way.....	20	5
Giant Dalkeith—A good cropper.....	20	5

CHARD, OR SEA KALE BEET.

Swiss Chard—Golden Ribbed, Red and White—The leaves of this are used as a spinach.....	10	5
--	----	---

CARDOON.

Sow in May, in rows, and thin out to one foot apart; bind together and earth up like Celery.

Large Smooth Solid.....	25	5
-------------------------	----	---

CHERVIL.

Make a succession of sowings. Begin in May. Cultivate same as Parsley.

Double Curled.....	\$2 per lb.; 20c. per oz.; 5c. per pkt.
Common or Plain.....	15c. per oz.; 5c. per pkt.

CHICORY.

Is a perennial plant; requires similar treatment to carrot. The root is used to mix with coffee, and the leaves as a salad. Per lb., 60c.; oz. 10c.; pkt. 5c.

CRESS OR PEPPER GRASS.

The curled and broad-leaved varieties sow thickly in shallow drills every two weeks throughout the season; give occasional waterings in dry weather. The Water Cress is an aquatic plant, with small oval leaves and dwarf habit. Sow the seed in a well prepared bed, and when rooted transplant to the banks of a running stream.

	lb.	oz.	pk.
Extra Curled—Best for salads....	50	10	5
Broad Leaved—A large leaved var.	50	10	5
True Water—An early and very wholesome salad.....	50	10	

CAULIFLOWER.

One ounce of seed will produce about 1500 plants.

	oz.	pkt.
Extra Early Dwarf Erfurt—Best forcing variety. Small leaves, pure white heads.....	\$4 00	25
HIGH GRADE EARLY ERFURT—Best Cauliflower for general crop. Sure header, heavy, solid, pure white	2 50	20
Dwarf Early Erfurt—Very early and similar to preceding, but not the highest grade.....	1 50	10
Henderson's Snowball.....	2 50	20
Extra Early Paris—Good Cauliflower for either forcing or outdoor culture.....	1 00	10
Half Early Paris—Large flower, good for general crop.....	1 00	10
LENORMAND SHORT STEM—Best late variety. Large, solid head. Good keeper.....	1 00	10
Autumn Giant.....	1 00	10

Our Stocks of Cauliflowers are specially selected for Market Garden trade.

CHARD.

HIGH GRADE ERFURT—FROM A PHOTOGRAPH.

EXTRA EARLY EXPRESS.

SECOND EARLY VARIETIES.

	oz.	pkt.
Henderson's Early Summer —Produces large and very solid heads, and comes in just after the Paris and Etampes. Soil must be rich	15	5
Succession —A trifle later than the foregoing, but with a head much larger in size and of finer appearance and quality. A splendid sort for exhibition purposes	20	5
Jersey Wakefield —Early, large and solid. American saved seed	.5	5
Charleston Wakefield —A large type of Wakefield, coming in a few days later than the Jersey.	20	5

- Cabbage -

Our strains of Cabbage Seeds are the very best procurable, of American and European growth.

One ounce of Seed will produce about 1,500 plants.

EARLY VARIETIES.

	oz.	pkt.
Extra Early Express —The earliest variety yet introduced; is conical in shape, resembling the Etampes, but from 8 to 10 days earlier	20	5
Early Spring —The earliest flat Cabbage, maturing with the Wakefield and yielding one-third more in weight than any of the early varieties.	70	10
Early Paris Market —Is of the Ox-heart type, but larger and 10 days earlier. Forms a saleable head very quickly. Valuable for market.	15	5
Early Etampes —Also Ox-heart type. Though forming a <i>hard head</i> as early, if not earlier than the preceding: the first cutting for market will be made from the Paris. Both are thoroughly reliable early varieties, and we recommend them with the greatest confidence to our market garden customers	15	5
Large Ox-heart —A fine flavored early sort, heads large and firm, and suitable for market gardeners	20	5

LARGE AUBERVILLIERS SAVOY.

LARGE BRUNSWICK SHORT STEM.

Vandergaw—A Second Early variety, and a great favourite with Long Island gardeners. A sure header, and produces a head larger and of better colour and quality than Henderson's Summer 15 5

LATE VARIETIES.

Excelsior Late Flat Dutch—A reliable variety with large solid heads 20 5
Autumn King, or World Beater—One of the best late varieties in cultivation 15 5
Fottler's Improved Brunswick—Large solid head. If planted early will be ready for use in August 15 5
Large Brunswick Short Stem—Used as a second early and late variety, and produces very large and solid heads. A fine sort 15 5
St. Denis—A fine late French variety; a splendid keeper owing to its solidity of head. Very popular in the Quebec market. 15 5
Marblehead Mammoth—Fine late sort; grows very large and firm, and keeps well. American saved seed 20 5
Cow Cabbage, or Marrow Stem Kale (Chou Moellier)—A rank growing variety, without head, but with abundant leaves and large nutritious stem. Used for cattle fodder 10 5

SAVOY VARIETIES.

LARGE AUBERVILLIERS—An extra large Drumhead Savoy with few outside leaves. This new variety is exceedingly mild flavoured and agreeable to the taste 20 5
Drumhead—Very large and hardy; best for general culture 20 5
Early Dwarf Ulm—An early, tender and delicately flavoured variety 15 5

RED VARIETIES.

Mammoth Red Rock—The largest Red Cabbage 20 5
DARK RED EARLY ERFURT—Very early and of deep blood colour. Head solid 20 5
Red Dutch—For pickling 20 5
Large Red Drumhead—For pickling; very large and solid 20 5

CABBAGE--Continued.

SECOND EARLY VARIETIES--Continued

	oz.	pkt.
All Head —The largest heading of the Second Early varieties.	20	5
All Seasons —An early Drumhead Cabbage, yielding heads of good size. Good for either spring or fall use.....	20	5
Early Winningstadt —Many consider the Winningstadt the very best for early market sales. The head is so hard and solid that it is not affected with the cabbage worm to the same extent as other varieties.	15	5
LARGE LUPTON —Resembling the Vandergaw, but an improved type of this variety. A fine S. E. sort..	20	5

EGYPTIAN RHEUMATIC OIL.

Cures RHEUMATISM.

CERTIFICATES.

WONDERFUL CURE OF RHEUMATISM.

Our well-known fellow citizen, Joseph E. Hamilton, for many years commercial traveller for the Robert Taylor Boot and shoe Company, writes as follows:

MR. WEBB— HALIFAX, N. S., Nov. 18, 1897.

DEAR SIR,—I feel that I owe a debt of gratitude for your kindness in directing me to the use of your EGYPTIAN RHEUMATIC OIL and CRIMSON PILLS. I have been a great sufferer from Rheumatism for three years—the last one of which I was practically helpless, but your remedies have made a NEW MAN of me within the last two months. I find myself getting better every day, and for relief of that dread disease can recommend your OIL and PILLS to all sufferers.

(Sgd.) J. E. HAMILTON.

HALIFAX, 9th September, 1897.

JNO. W. WEBB, CHEMIST, Granville St.

DEAR SIR,—The "EGYPTIAN OIL" I had is doing my Rheumatism good. I can now straighten my knee, which I had not been able to do for six months, and intend persevering with it. If you are sending up this way will you please send me another bottle.

Yours truly, A. WILLIAMS,
15 Dundonald St, City.

EGYPTIAN RHEUMATIC OIL.

J. W. WEBB, CHEMIST.

SIR,—I am pleased to certify that after suffering with Rheumatism seventeen weeks, eight of which I was confined to bed, during which time I took seven bottles of South American Cure and other remedies without any benefit, providentially saw the advertisement of the EGYPTIAN RHEUMATIC OIL. I sent and got a bottle, which entirely removed the pain.

I am now able to attend to work and cordially recommend all sufferers from Rheumatism to use the EGYPTIAN OIL.

(Sgd.) WM. G. GRAR,
Oct. 20, 1897. 45 Young St. Halifax.

READ WHAT THE SON OF A POLICEMAN SAYS.

J. W. WEBB, CHEMIST. HALIFAX, Oct. 25, 1897.

SIR,—I certify that I was helpless with ACUTE RHEUMATISM for three weeks, and used many remedies without deriving any benefit; at last I heard of your EGYPTIAN RHEUMATIC OIL, and got a bottle a week ago. Up to that time I was not able to put my feet to the ground, but to-day I have been walking about out of doors all the afternoon and am entirely free from pain.

JOSEPH McCAREY,
34 Maynard Street, Halifax.

CERTIFICATES.

EGYPTIAN RHEUMATIC OIL NEVER FAILS TO CURE RHEUMATISM.

HALIFAX, Oct. 22, 1897.

I wish to inform the public that I have been a sufferer from Rheumatism for the past three months. I have used the EGYPTIAN OIL and have found a speedy cure.

I hereby recommend all suffering with Rheumatism to give the EGYPTIAN OIL a trial.

Yours truly, WM. FISHER, Fireman.

A VOICE FROM NEWFOUNLLAND.

HALIFAX, N. S., Nov. 6, 1897.

For twelve years I suffered from Rhumatism in my shoulder and arm and used a great many remedies, none of which gave any relief. Ten days ago I was induced to use the EGYPTIAN RHEUMATIC OIL, and after using about one third of a bottle I found great relief, and am now quite free from any effects of Rheumatism.

I have pleasure in stating the facts in the interest of all those who are suffering from the terrible disease.

P. KEEFE, Capt. Schr. Defender.

IT CURES RHEUMATISM EVERY TIME.

J. W. WEBB, CHEMIST. HALIFAX, N. S. Oct. 23, 1897.

SIR,—I took one dozen bottles of your EGYPTIAN RHEUMATIC OIL with me to the Lahrador last month, and in two instances in which I saw it used I was AMAZED at the SPEEDY AND COMPLETE CURES it effected. I was only sorry I did not have ten times as much with me, as the people who saw its results were all anxious to secure a bottle.

ISAAC GREENOUGH,
Schr. Oregon, Petpiswick Harbor.

MUSQUODOBIT HARBOR, Dec. 13, 1897.

TO THE EGYPTIAN RHEUMATIC OIL Co.;

I certify that I was confined to my bed with RHEUMATISM in my back for several days. I obtained a bottle of the EGYPTIAN RHEUMATIC OIL, and after using less than half of it I found great relief and to-day do not feel the presence of any Rheumatism in my system.

ARCHIBALD BAYERS.

STILL THEY COME.

HALIFAX, 27th Oct., 1897.

I certify that I was laid up with RHEUMATISM utterly helpless for nine days, four of which I was confined to bed. Last Saturday my father got a bottle of your EGYPTIAN RHEUMATIC OIL, of which I have only used half, and am now well. I recommend all sufferers with RHEUMATISM to use EGYPTIAN OIL.

JOHN R. BURKE, 185 Upper Water Street.

MONTREAL.

One ounce of seed will sow one hundred feet of drill, and four pounds will sow an acre.

Quarter pound at pound rates.

	lb.	oz.	pkt.
French Forcing Horn —Best forcing variety	\$1 00	10	5
Early Scarlet Horn —An early useful sort	75	10	5
Half Long Chantenay —Half long scarlet. An improved variety of Nantes, but with large shoulders and more productive. Extra fine sort	75	10	5
Half Long Carentan —A coreless variety and very heavy cropper	75	10	5
Henderson's Intermediate —Pointed rooted; large, smooth deep orange roots	90	10	5
IMPROVED HALF LONG DANVERS —Tapering root, very heavy cropper. The heaviest cropping red carrot.	90	10	5
Half Long Stump Rooted —Heavy cropper; does not require so deep soil as the long varieties	70	10	5
Half Long Nantes —Heavy cropper; a select stock of preceding variety	70	10	5
James' Scarlet Intermediate —A well known half long pointed variety	70	10	5
Half Long Guerande, or Ox-heart —Intermediate in length between the half-long Stump-rooted and the Early Horn. The root is very thick at the shoulder, tapering slightly to the point; is early, and of fine quality and a heavy cropper	80	10	5
Long Red Stump Rooted —This sort has but little core or pith, which is a great acquisition in a table Carrot. Is the best flavoured variety in cultivation	80	10	5
Long orange —A very long sort, of good colour and flavour	50	10	5
Long Red Altringham —Large and of fine quality; keeps well	70	10	5

The above Stocks are all High Grade, French Grown,
and Clean Rubbed Seed.

FIELD VARIETIES.

ONTARIO CHAMPION (Iverson's Half Long White)—The heaviest and best White Carrot grown. Ontario grown seed of splendid quality. (See Cut)	50
Large White Short Vosges —A fine sort which we highly recommend, especially for heavy soils, as it is very thick and short, and easily pulled	40
White Belgian —The largest of the field varieties	35
Yellow Belgian —Hardly as large as preceding, but more solid	35

Carrots to grow in perfection require a rich, deep, sandy loam, well pulverized and deeply cultivated. For an early crop sow in May and June in drills about one foot apart, thinning out to 4 inches in the row; sow for main crop in June. The large late varieties for field culture should be sown in drills 3 to 3½ feet apart, so as to cultivate by horse. An important point in sowing carrot, as in all other seeds, is to tread the rows firmly after planting.

OUR PRICES
INCLUDE
POSTAGE

Our **CENTRAL FARM LAWN GRASS MIXTURE** is composed of only the best re-cleaned Grasses, and will make a **HARDY LAWN**. 25c. per lb. postage paid.

CELERY.

One ounce will produce about 2,500 plants.

Paris Golden Yellow —Is of medium height, fine flavour and perfectly solid, and needs but little or no earthing up. The outer ribs are of a yellowish white, while the heart, which is large and solid, is of a rich golden yellow, and it thus has a most striking appearance on the table, and is a good keeper	50	10
Henderson's White Plume —Needs but little earthing up, is of fine flavour. Leaves being variegated with creamy white are very ornamental on the table; should be used early....	25	5
Pink Plume —A very early variety of good flavour and beautiful pink shade of colour. Like all red celeries, it is a good keeper.....	75	10
Golden Self Blanching —Of same character as White Plume, but of a rich golden colour.....	30	5
Dwarf Large Ribbed —A remarkably solid sort, requiring little earthing up. We recommend it to market gardeners.	20	5
Giant Paschal —Grows one-third higher than Paris Golden Yellow. Colour white with golden heart. The stalks have a remarkable breadth and thickness and have a fine flavour; solid and nutty, and is one of the best celeries for keeping through the winter.....	20	5
White Triumph —One of the best varieties for spring use, being a splendid keeper and of excellent quality. Solid, clear white and fine nutty flavour.....	60	5
Kalamazoo —A good late Celery, highly esteemed in some quarters.....	30	5
New Rose —A new variety, of deep rose colour, very solid and crisp, and one of the best in cultivation.....	25	5
Large White Solid —Very large; good for early use.....	20	5
Boston Market Dwarf —Branching habit; nutty flavour ..	20	5
Celeriac, or Turnip Rooted	25	5
Celery Seed for Flavouring per lb., 40c.	5	

ONTARIO CHAMPION WHITE CARROT.

CORN SALAD.

Sow in September in shallow drills, and protect with straw during the winter. The leaves are much esteemed as an early spring salad.

Per oz., 20c.; per pkt., 5c.

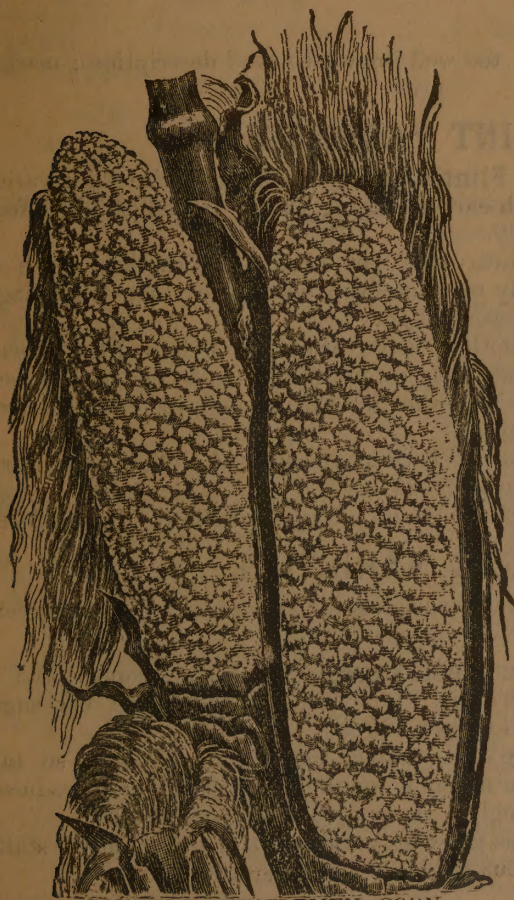

CORN.

EARLY VARIETIES.

- Ford's Early Sugar**—This new variety is quite as early as the Cory, but possesses the great advantage of being perfectly white in the grain, while the ear is about equal in size to the Crosby 1b. 12
- Early Cory**—The earliest variety yet introduced. Market Gardeners growing the Early Cory control the early market, this variety being fully a week earlier than the older varieties of early corn doz. ears, 50c. 12
- Early White Cory**—A white variety of preceding 12
- Kendel's Giant**—This new and distinct variety of Sweet Corn combines more merit than any other early variety in cultivation. Ears grow to a tremendous size, measuring 8 to 10in. long and having 10 to 18 rows on each cob, the majority 12 rows; kernels pure white, sweet and tender 15

MEDIUM EARLY.

- Crosby Early Sugar**—Standard early variety. . doz. ears, 50c. 15
- Country Gentleman**—A delicious variety and very desirable for private use. Ears are of pearly whiteness, and although small, the kernels are exceedingly long 15
- None Such**—This splendid sort is a 12-row corn, with ears about as large as Evergreen Sugar. When in the green state the kernels are as white as snow and of delicious sweetness. 15
- Old Colony**—A sweet variety. Stalks 6 to 8ft. high; large handsome ears. A selection of the Evergreen, but ten days earlier. Desirable for canners and market gardeners 12

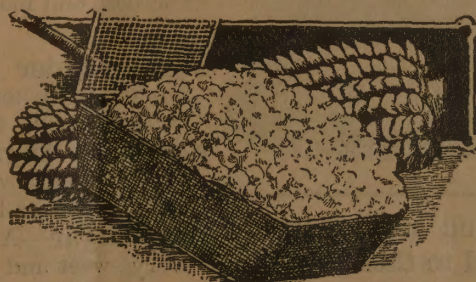

COUNTRY GENTLEMEN CORN.

- Hickox Improved Sugar**—An excellent second early sort, very sweet and a fine cropper 1b. 12
- Mexican Black Sugar**—A black seeded sort, and perhaps the sweetest of all sugar corns 15
- Perry's Hybrid**—An early large-eared variety; very sweet 12
- New Champion**—A fine medium early sort, with large ears 15

LATE VARIETIES.

- Zig Zag Evergreen**—The most desirable acquisition in Sugar Corn since the introduction of Stowell's Evergreen. Named Zig Zag Evergreen because of its irregular rows on the cob. It will out-yield any other Sweet Corn in cultivation. Is white in appearance, and owing to its tenderness, fine quality and delicate flavour, it cannot fail to please 15

WHITE RICE POP CORN.

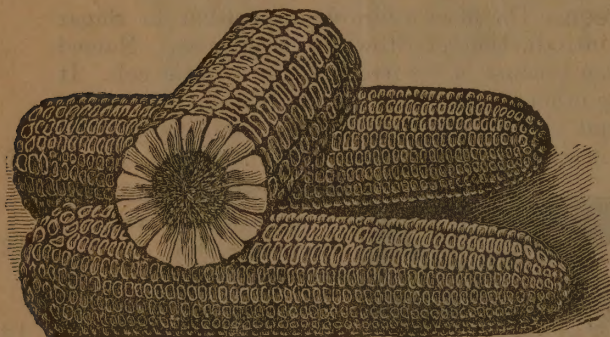

- Evergreen Sugar**, The standard late variety. doz. ears, 60c. 12
- Mammoth Sugar**—Largest of all varieties, and very fine flavour. 12
- Canada Yellow**, dz. e. 30c. 10
- Canada White**, dz. e. 30c. 10
- Pop Corn**—White Rice. The best popping sort. 12

CORN FOR ENSILAGE

In the production of Ensilage of the best quality, it is of the utmost importance to select only the best varieties of corn and in this country especially, the early ripening sorts. It is a mistaken idea that any sort of corn will make good Ensilage. One might as well expect any sort of beet or carrot to be equally good for table and stock feeding. While then it is of great consequence to have a maximum yield of stalks (and that result can only be had from the **Giant Dent Varieties**) Excellent quality of Ensilage can only be obtained from the **Early Ripening Varieties** of these. Some of the **Improved Dent Varieties** are now just about as early as the Flint Varieties and some of them should always be used. Red-cob although a splendid yielding variety, is in the average Canadian Season, too late in forming a good ear. Too much importance cannot be given by **Dairymen** to the **Sugar Varieties** for either green feed or curing. Cattle fed with the Evergreen Sugar or Mammoth Corns will give good results and will waste none. This season the seed of the sugar sorts is unusually good and germinates well and the price is within reach of all.

WHITE CAP YELLOW DENT CORN.

When ordered by the Pound and by Post,
5c. per lb. must be added to these prices.

DENT VARIETIES.

New White Cap Yellow—Matures three weeks earlier than Red cob, grows heavy, leafy stalks, the lower leaves keeping long green, and while the ears are as large as any of the Dent Varieties, they are more numerous and much fuller at the points. Taking it all round it is the safest variety of Ensilage Corn we know of, being as sure to produce a crop of ripe ears in this latitude as the native White Canada Flint Corn. Peck 40c.; bush \$1.25.

King of the Earliest—This is one of the Earliest varieties of Dent Corn in cultivation, a very strong grower with plenty of foliage. 10 feet. Peck 40c.; bush \$1.20.

Champion White Pearl—This new variety has given very great satisfaction. It is a medium early White Dent variety, of branching habit and profuse foliage, and produces large sized ears. We strongly recommend it. 10½ feet. Peck 40c.; bush, \$1.25.

CLARKS EARLY BUTLER—A good all round corn. Peck 40c. bush. \$1.20

CLARKS EARLY MASTODEN—This is the largest eared early corn and produces a heavy yield of fodder. It is the favorite variety in the United States to-day and is worth a trial here. Peck 40c.; bush. \$1.20.

Giant White Southern	} too well known to need description ; market price.
Red Cob.....	
Horsetooth.....	

FLINT VARIETIES.

Thoroughbred White Flint—One of the finest White Flint varieties. Is very leafy, with ears averaging 12 in. in length. 10 feet. Peck, 40c.; bush., \$1.30.

Sandford—A White Flint variety of strong growth, and sure to ripen its ears sufficiently to make the best sweet tasted Ensilage. 8½ feet. Peck, 40c.; bush., \$1.25.

Early Longfellow—Another early variety of Yellow Flint Corn; generally conceded—and justly so, we think—to be one of the best of the very early varieties, either for Ensilage or ripe corn. 8 feet. Peck, 40c.; bush. \$1.20.

Early Compton—One of the earliest varieties of Yellow Flint Corn. 8 feet. Peck, 40c.; bush., \$1.20.

Large Canada White, Bush., \$1.20, Canada Yellow. Bush., \$1.20

SUGAR VARIETIES.

The best and most profitable varieties for Dairymen for either green feed or curing dry.

Sugar Fodder or Evergreen Sugar—Is a heavy cropper, and is undoubtedly more nutritious than other sorts that are not sugar varieties. 9½ feet. \$4.00 per 100 lbs.

Mammoth Sugar—The same class as the preceding, hardly so tall, but no variety of corn excels it for the number of ears produced. We recommend it strongly. 5c. per lb.; \$4.00 per 100lbs.

Ruby Sugar—A vigorous growing variety with ruby coloured stalks very sweet and nutritious fodder. \$4.00 per 100 lbs.

CUCUMBER.

SELECT NORTHERN GROWN SEED.

One ounce will plant about 50 hills.

Market Gardeners' White Spine —A select stock of this well known variety. Seed saved with the greatest care from the earlist and best specimens	lb. oz. pkt.
	75 10 5
Arlington White Spine —A remarkable fine strain, growing very even in size and regular in form. It is especially recommended to market gardeners from the fact that the first set on the vines is unusually even in form and size, and continues so throughout the season; retains its colour.	80 10 5
Peerless White Spine —This new sort grows extra long, is of handsome and smooth shape, very early and prolific. It differs from the other strains of White Spine as it always remains deep green color.	80 10 5
New Giant Pera —A Turkish variety of excellent flavour; crisp and tender at all stages of growth. Grows to a great size, frequently 12 to 18 inches in length and 8 to 10 in circumference	1 00 10 5
Improved Long Green —A superior strain of this variety, fine dark green colour, uniform size, crisp and tender	70 10 5
Long Green Prickly —Fine dark colour, approaching to yellow on maturity, tender and well flavoured.	80 10 5
Giant White Perfection —A distinct and valuable variety, wax white.	10 5
Paris Pickling —Is decidedly the best of all in quality for pickling. When ready for pickling shows no sign of seed	15 5
Cool and Crisp —An excellent variety for pickling. At pickling stage the points are long, even and slim, crisp, dark green, good for slicing	1 00 14 5
Japanese Climbing	20 5
Green Prolific (or Boston Pickling)—A fine pickling variety	80 10 5
Early Frame —Medium size; good flavour	80 10 5
Early Cluster —Small, early and productive	80 10 5
Early Russian —Early, hardy, and good for pickling	80 10 5
West Indian Gherkin (or Burr)—Jerusalem Pickle.	20 5

Early White Long.....	50 5
Early White Round.....	50 5
Striped.....	50 5
Improved New York Purple, very large.....	50 5
Black Fruited, from Pekin.....	75 10

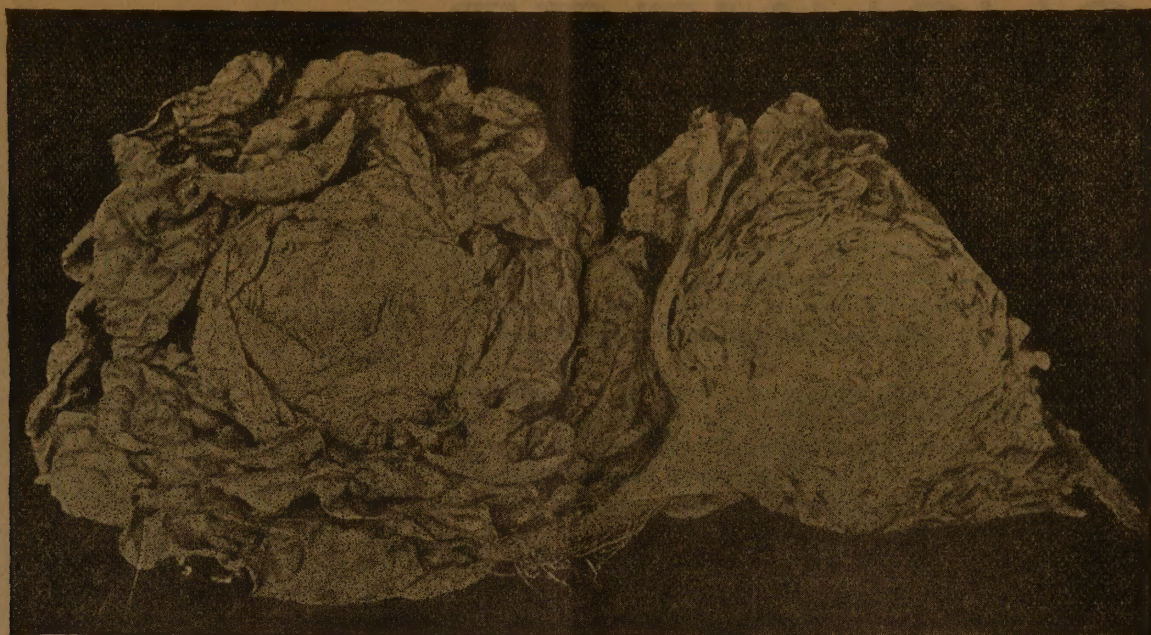

KOHL RABI.

A hybrid between the Turnip and Cabbage; culture the same as Cabbage. Immediately above the ground the stem swells into a bulb similar to a Turnip. Should be used before it is quite ripe.

Pur. Giant. . 1 50 10 5
White Imp. . 1 50 10 5

GREEN CURLED ENDIVE

ST. LOUIS LETTUCE.

LETTUCE.

One ounce will sow about 100 square feet.

	oz.	pk
Golden Queen —A fine golden green colour, one of the best for forcing. Forms a large solid head.	25	5
Wheeler's Tom Thumb —A small variety, but the best for early forcing.	20	5
Grand Rapids —One of the best loose-headed varieties for forcing. Good quality, crisp and tender. Leaves grow very upright, therefore plants can be grown closely.	20	5
Asparagus Lettuce —New. Does best when sown very early in spring. The midrib is prepared and served the same as Asparagus.	30	5
St. Louis —An excellent sort of Lettuce, producing good-sized solid heads, very crisp and tender. We strongly recommend it for forcing, and is also good for open-air culture.	20	5
Denver Market —A very fine sort for either forcing or growing outdoors. It forms large solid heads of a light green colour, and the distinctiveness of the variety is marked by its beautiful crimped leaves, resembling the Savoy Cabbage.	20	5
Large Passion —Grows to a great size and of fair quality.	15	5
Prize Head —A much esteemed Western variety, making very solid heads.	15	5
Nonpareil —An old variety yet one of the best; beautiful yellow-green, heads large and solid, very tender.	20	5
Early Curled Simpson —A black seeded, popular old variety.	15	5
Boston Curled —Leaves beautifully curled; good forcing variety.	20	5
California Cream Butter —This variety forms large, solid, round compact heads, light green outside and creamy yellow within. Is medium early and strongly recommended as a summer variety.	20	5

MONSTROUS CARENTAN LEEK

COS VARIETIES.

PRINCE OF WALES COS —A new variety of splendid quality.	20	5
Green Paris Cos	20	5
White Paris Cos	20	5

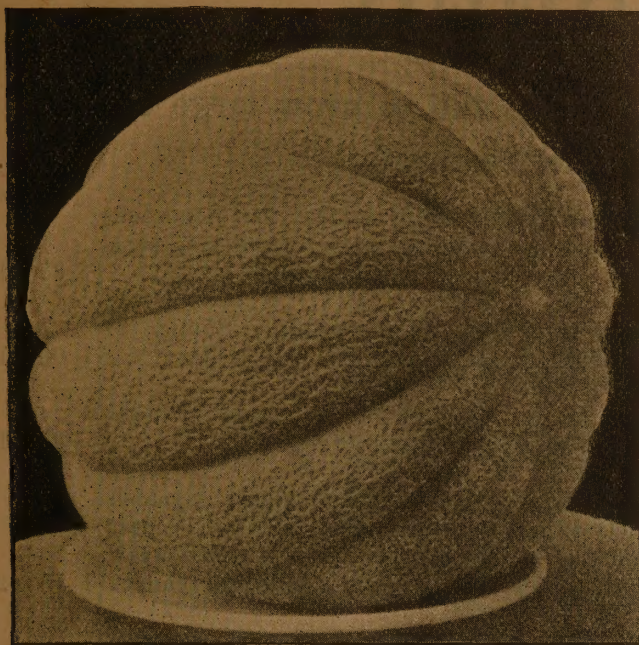

We can also supply the following standard varieties, which are too well known to need description, at the uniform price of 15c. per oz.; 5c. per pkt.:

Tennis Ball, Victoria, Deacon, Hanson, Salamander, Boston Market, Curled Silesian, Bossin Giant.

LEEK.

One ounce of seed will sow one hundred feet of drill.

THE LYON —A splendid Exhibition variety and can be grown to a great size. We recommend it to all exhibitors.	25	10
Flag —The variety mostly grown. lb. \$1.25	15	5
Musselburgh —A much esteemed variety; very hardy, grows large. lb. \$2.00	20	5
Monstrous Carentan —A large and excellent variety. lb. \$2.00	20	5

MONTREAL NUTMEG—OUTREMONT BEAUTY.

JERSEY BELLE.

CHINESE MUSTARD.

MELON.

MUSK VARIETIES—One ounce will plant about seventy hills.

	oz.	pkt.
Montreal Nutmeg (Outremont Beauty)—Light green, thick flesh, thin rind. The best Melon in cultivation. Our stock was grown by one of the best Montreal growers in shape. Skin when ripe is a bright yellow and heavily netted. Flesh is a deep rich orange, very fine in grain, high quality...	50	10
Perfected Delmonico —Almost round in shape. Skin when ripe is a bright yellow and heavily netted. Flesh is a deep rich orange, very fine in grain, high quality...	25	5
Jersey Belle —This is the largest and earliest of the early ripening Cantaloupes. Resembles Montreal Nutmeg in appearance. Flesh green and of good flavour.....	20	5
Early Hackensack —A well known and much esteemed old variety. Ripens early, very productive, flesh green, fine flavour...	15	5
Banquet —A deliciously flavoured new salmon-coloured variety, grows to good size, and a distinct and beautiful appearance...	20	5
Montreal Market —American grown seed.	15	5
Green Nutmeg —A green fleshed variety, finely netted, slightly oval shaped.....	15	5
Mango or Vegetable Peach —A novel variety of vegetable.....	25	5
Christiana —Red flesh; very early.....	15	5
Large Yellow Musk —Large, deep ribbed, oval shaped.....	15	5
Bay View —Large and productive, flesh sweet, thick and luscious.....	10	5
Emerald Gem —Skin an emerald green, white ribbed and smooth; flesh salmon coloured and of unequalled flavour.....	15	5

WATER MELON.

Green and Gold —Flesh bright straw colour and of fine quality; skin dark green.....	15	5
Improved Mountain Sprout —A long variety with dark green skin, fine quality of flesh; a good market variety.....	10	5
Peerless —Very solid, sweet scarlet variety.	15	5
Ice Cream —White flesh; nearly round.....	15	5
Black Spanish —Round in form; red flesh..	15	5
Long Island —Red flesh.....	15	5
Phiney's Early —Very early; flesh scarlet, very thin rind, sweet and luscious.....	15	5
Mountain sweet —Fine quality, oval, scarlet.	15	5
Cuban Queen —Very solid, oval shaped sort.	15	5
CITRON —Round small fruit, for preserves..	15	5

MUSTARD.

A pungent salad, generally used with cress.

White —Best variety for saladslb. 30c.	10	5
New Chinese Curled —The leaves of this variety are almost as curled as parsley. Flavour mild and agreeable.....	10	
Chinese —This variety grows twice as large as the common sort, and the flavour is much milder and pleasanter.....	10	5
White —2nd quality. For flavouring pickles and relishes. Lb., 20c.		

ONION SEED.

One ounce will sow one hundred feet of drill; and to grow large onions, five pounds to the acre is required.

	lb.	oz.	pkt.
Large Red Wethersfield —Large flat handsome bulbs; is the standard variety in this market, a heavy cropper and a splendid keeper	85	10	5
Extra Early Red Wethersfield —Similar to Red Wethersfield, but smaller and earlier	1 00	10	5
Yellow Globe Danvers —Early and of mild flavour; a good cropper	80	10	5
Giant Prize Taker —This immense Spanish variety is probably the largest and handsomest onion grown. The outside skin is of a rich straw colour, while the flesh is white, mild and tender.	1 75	20	5
Silver King —Single onions of this variety, grown from seed, the first season have weighed as much as 3 lbs. Matures early, in shape somewhat flat, and of an exceedingly mild and delicate flavour.	1 50	15	5
Red Globe —Mild flavour and handsome shape ..	1 50	15	5
White Globe —Same as preceding except in shape ..	2 25	20	5
White Portugal —Flat shaped, early, mild flavor.	2 00	20	5
Giant Rocca —A globe-shaped sort; yellowish colour; grows very large and is of mild flavour ..	1 50	10	5
The Queen —A small, silver-skinned variety; remarkably early. Makes a fine pickling onion ..	2 00	20	5
Early White Barletta —A white pickling variety is three weeks earlier than "The Queen", and must, on that account, become a favourite	2 25	20	5
Yellow Strasburg —Fine variety for the production of sets	1 50	13	5

SPINAGE.

One ounce will sow one hundred feet of drill. Ten or twelve pounds for an acre in drills.

VIROFLAY SPINAGE.

	lb.	oz.	pk.
EARLY GIANT CRUMPLED LEAVED —One of the very best varieties for general crop.....	40	10	3
Viroflay —One of the best varieties for marked gardeners; produces a thick crumpled leaf, and stands a long time without running to seed	30	10	3
Round —Good for general crop.....	30	10	3
Lettuce Leaved —Deep green succulent leaves	30	10	3
Long Standing —A valuable sort for spring sowing; does not run to seed quickly	30	10	3
Norfolk Savoy Leaved —Leaves large and thick, and wrinkled like the Savoy. Is an immense cropper and very hardy.....	30	10	5
Prickly —Hardy; for autumn sowing.....	40	10	5

VEGETABLE MARROW.

SQUASH.

Early White Bush Scallop. } Both very productive and	1 00	10	5
Early Yellow Bush Scallop. } early.			
Summer Crookneck } Both good, the Summer being the	1 00	10	5
Winter Crookneck } best early Squash.			
Mammoth Hubbard —This is a select strain of this popular variety, the squashes growing to a great size..	1 50	15	5
Hubbard —A large, green, late sort, very dry flesh; good keeper.....	1 00	10	5
Marblehead —A winter variety resembling the Hubbard, but lighter coloured flesh; dry and sweet.....	1 00	10	5
Turban —A superior late variety, of fair size.....	1 00	10	5
Boston Marrow —A late variety, a good keeper, and of fine flavour	1 25	10	5
Acorn —A fine late sort of fine flavour.....	1 50	10	5
Fordhook —An excellent new squash of handsome appearance, yellow outside and straw yellow within. The flesh is dry and of the most delicious flavour. It ripens early and is one of the best keepers we know of; it can be kept all through the winter until June. We can highly recommend it to our customers.....	1 25	15	5
Early Prolific Marrow —A large oval-shaped variety, something like the Boston Marrow, but a brilliant orange-red colour. There is no winter variety that can compete with it in earliness and productiveness	1 00	10	5
Mammoth —Very large. Selected seed.....		20	5
Vegetable Marrow —The favourite English variety; fruit long white with white flesh; tender and rich in quality. Plant 8 feet apart	2 00	20	5
Long White Bush Marrow —This variety is a great improvement on the old trailing Vegetable Marrow. The fruit is larger and handsomer, and the plant is of perfect bush form.....	2 00	20	5
Pen-y-Byd Marrow , or Best in the World—This new Marrow is perfectly round in form, and the quality is what the name denotes.....		30	5

NEW YORK PURPLE EGG PLANT.

TOMATO.

One ounce will produce about 1300 plants

oz. pk.

Atlantic, Earliest of All, or Early Ruby—This fine variety produces medium sized, smooth, solid and finely coloured fruit, and is one of the very early sorts, and probably the best variety for early marketing..... 30 5

General Grant—A well known extra early variety..... 30 5

Vick's Early—A fine, smooth early variety, highly recommended..... 30 5

New Imperial—A splendid variety; early, fine form, solid; one of the best extra early sorts..... 30 5

Early Michigan—An early, smooth variety; quite as early as Atlantic, with larger fruit..... 30 5

The Stone—Fruit very large, bright scarlet, very smooth, ripening evenly to the stem without a crack; exceedingly solid and firm fleshed. One of the best..... 30 5

Royal Red—Royal Red is a first-class main crop variety, and will prove of special value to canners and catsup makers by reason of its beautiful deep red colour..... 30 5

Buckeye State—New, one of the largest; fruits in immense clusters; in solidity and meatiness it has no equal. Colour similar to Beauty, but somewhat darker and richer..... 30 5

Canada Victor—Very early, fine firm flesh, prolific bearer.. 25 5

Aeolus—A fine early smooth sort, one we can recommend.... 25 5

Volunteer—The fruit grows to great size, very perfect in form, fine bright red colour, early and productive..... 30 5

Mikado—Very large and solid; purplish red fruit..... 30 5

Dwarf Champion—Its comparative freedom from rot, its remarkably erect habit, the fine form, colour and rich meaty quality of its fruit, has made Dwarf Champion an acquisition in many a garden..... 30 5

Brinton's Best—Pronounced the very best Tomato ever grown. Medium early, vines grow vigorously, produce an abundant crop of finely formed, large, perfectly smooth fruit, beautiful deep red colour. It will pay gardeners to give it a trial..... 30 10

Ignotum—Very early and prolific. Delicious flavour..... 30 5

Livingston's Beauty—A fine, large, solid variety, and an immense yielder. It is a fine sort for private gardens... 30 5

Livingston's Favourite—Dark red, very large, perfectly smooth, hardly ever rots or cracks. Very popular..... 25 5

Pondorosa—The largest Tomato in cultivation.. 40 5

Livingston's Perfection—This sort has every valuable quality, good size, extremely early, blood red colour, perfectly smooth..... 25 5

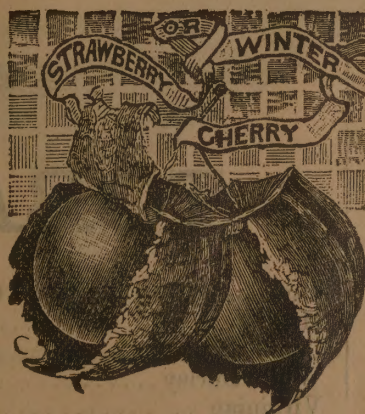

Trophy—Grows to immense size; solid; fine flavour, keeps well..... 25 5

Large Yellow—Useful for preserves..... 40 5

Yellow Plum—For preserves..... 50 10

Strawberry—Ground Cherry or Husk Tomato—is strawberry flavoured, and is used for preserving..... 60 5

Peach Tomato—This beautiful variety is produced in clusters, is solid and red coloured inside while the skin is pinkish with red blush..... 40 5

EXTRA EARLY WHITE MILAN.

SCARLET KASHMYRE.

TURNIP.

Garden Varieties—One ounce will sow one hundred and fifty feet of drill.

	lb.	oz.	pk.
Extra Early White Milan —The very earliest turnip in cultivation. The bulbs are pure white, and beautifully and uniformly shaped. The tops are very small and the quality of the flesh unsurpassed	90	20	5
Early Purple Top Milan —The earliest turnip in cultivation. Bulbs flat and of medium size, very smooth, flesh white and of fine quality, and a good keeper.....	85	10	5
Scarlet Kashmyre —Although the skin of this new turnip is a beautiful light-red colour, the flesh is pure white, is tender and pleasantly tasted. It withstands drought much better than any other variety, a good recommendation in a garden turnip.....	15	5	
Robertson's Golden Ball —The best of the Yellows for general crop.....	50	10	5
Purple Top White Globe —An early variety, globe-shaped; heavy cropper; in other respects similar to the Red Top Strap Leaf. A handsome-looking bulb, and is rapidly taking the lead of all other varieties of early turnip for market garden purposes	60	10	5
Early Stone —Matures quickly	60	10	5
White Dutch —Very fine and juicy; best for early sowing.....	50	10	5
White Strap Leaved —Fine sort for quick growth.....	60	10	5
Red Strap Leaved	50	10	5
Purple Top Early Munich —An early sort..	60	10	5
Laing's Swede —Fine purple top garden variety of Swedish turnip, of medium size and excellent quality.....	25	5	3
Sweet German Swede —A medium sized garden turnip of extraordinary fine flavour and solidity of flesh.....	50	10	5

TOBACCO.

Canelle —A fine flavoured Canadian variety	75	10
Havana	60	5
Connecticut	40	5
White Burley	40	5
Virginian	40	5

TURNIP.

STOCK FEEDING VARIETIES.

CHAMPION PURPLE TOP.

Sow 2 to 4 lbs. per acre in drills.

YELLOW FLESHED TURNIP.

Green Top Yellow Aberdeen	Lb. 25
Purple Top Yellow Aberdeen	25
Green Top Globe	25

WHITE FLESHED TURNIP.

White Globe	20
Grey Stone	20
White Flat Norfolk	25

SWEDISH VARIETIES.

Carter's Imperial Purple Top. —An excellent variety and very productive ..	20
Drummond's Selected Purple Top. —We recommend this as one of the best..	25
Elephant —This fine Tankard-shaped Swede is probably the largest variety; will yield 3 to 5 tons more per acre than others	25
Champion Purple Top. —Recommended for its size and good keeping quality...	20
Bangholm Purple Top. —Fine even cropper	20
Shamrock Purple Top. —A large and handsome variety and fine keeper	20
Skirving's Purple Top. —A strong growing variety, large root and good keeper....	20
Green Top Swede. —A handsome shaped variety, and good for table use	20

HERBS.

SWEET, POT AND MEDICINAL.

	oz.	pk.
Anise—For seasoning; resembles Fennel	30	5
Angelica—For seasoning	20	5
Balm—Used for making Balm tea ...	40	5
Basil Sweet—Leaves used for soups ...	40	5
Catnip—A favourite medicinal herb...	50	10
Coriander—Used for garnishing and the seeds for confectionery	20	5
Dill—Used for flavouring soups, etc ...	20	5

Hyssop—Used for medicinal purposes ..	20	5
Horehound—For medicinal purposes...	40	5
Lavender—A popular aromatic herb ...	25	5
Pot Marjoram	25	5
Rosemary—An aromatic herb	50	10
Sweet Marjoram. —For seasoning....	20	5
Summer Savoury. —For seasoning ...	15	5
Winter Savoury	25	5
Sage. —Used for dressing and sauces ..	20	5
Saffron	20	5
Sorrel Broad Leaved—Used for salads.	25	5
Thyme, Summer. —For seasoning, etc.	40	5
Thyme, Winter	50	5

MISCELLANEOUS SEEDS.

If by post add 5c. per lb. to prices of Bird Seeds.

BIRD SEED

Canary—Re-cleaned. 3 lbs. 20c; lb. 10c.
Hemp—3 lbs. 20c.; lb. 10c.
Imported Millet—3 lb. 20c.; lb. 8c.
German Rape—3 lbs. 25c.; lb. 10c.
Maw—lb. 20c.

Lettuce Seed for Birds—oz. 5c.

Standard Mixture—Re-cleaned Bird Seeds—3lbs. 20c.

Brock's Bird Treat—Per cake, 5c.

Dwarf Essex Rape.

Is considered indispensable by the sheep farmers of Great Britain, and is fast coming into use in this country on account of its rapid growth, being ready to feed in ten weeks from sowing. It can be sown all through the season, being perfectly hardy, withstands drought and will produce a crop in any soil by sowing broadcast or in drills; while unequalled as a pasture for sheep, as a fattening food for all kinds of live stock, it is without a rival in point of cheapness or effectiveness. Post paid, per lb. 15c.; per 100 lbs. \$7; 10 lbs. and upwards at 100 lb. rates.

TARES

Sunflower, Mammoth Russian—Now largely used for the Robertson Combination of ensilage and for medicinal purposes. Per 100 lbs. \$8.00; per lb. 10c. Sow 7 lbs. per acre.

Horse Beans—Sow early in drill—30 in-ches apart—1½ bushels per acre, in well manured land, and if possible in clay land or heavy loam. Canadian grown. Peck 45c.; bush. \$1.70.

Tares or Vetches—Very valuable as a green fodder for horses or milch cows, and can be sown as soon as the snow goes, thus making it the earliest fit for use of any Spring sown forage plant. Bush., \$1.30.

SACALINE POLYGONUM SACHALINENSE.

A perennial fodder plant of vigorous growth, claimed to be perfectly hardy. Packet, 20c.

Lupins—When sown in June and turned down with the plough when in full bloom, make the most valuable vegetable manure for reclaiming impoverished soil

Large Yellow—Per lb., 15c.

Large White—Per lb., 12c.

Wild Rice (*Zizania Aquatica*)—Much sought after owing to its having attractions for water-fowl. Lb. 30c; 10 lbs. 20c. per lb.

Flax Seed—For sowing, feeding and medicinal purposes. Per 100 lbs. \$2.25

LEMON OIL INSECTICIDE!

SOLUBLE IN WATER.

This well-known English preparation has become indispensable for the destruction and prevention of all insect life on Plants or Animals. Acknowledged to be the cheapest, safest and most effectual Insecticide extant for all purposes. **Destroys all Insects** on the leaves and roots of Plants **without injury to flower or Foliage**. This will be found a capital wash for Dogs ; it cures Mange, destroys lice and all insects and gives the coat a beautiful glossy appearance.

We have much pleasure in presenting it to our friends. The success which has attended its introduction has been most encouraging, and LEMON OIL INSECTICIDE only wants a trial to convince the user of its merits. It can be sent by freight or express.

OPINIONS of Leading Horticulturists in reference to "Lemon Oil Insecticide":

PUBLIC GARDENS, HALIFAX, N. S.

I have used your "Campbell's Lemon Oil Insecticide" and have found it sure death to Green and Black Aphids, Mealy Bug and Brown Scale when used according to directions, and I most cheerfully recommend it to anyone troubled with the above pests.

RICHARD POWER,
Superintendent.

FENWICK STREET NURSERIES, HALIFAX, N. S.

I have great pleasure in stating that since I commenced to use "Campbell's Oil Insecticide" as supplied by you, that I have had no difficulty in keeping down all classes of Insects and diseases which plants are subject to, and I would strongly advise all Gardeners that have not used it to give it a trial, when I feel sure after so doing they will discard all others in its favor.

W. M. TAIT.

SCHOOL OF HORTICULTURE,
WOLFVILLE, NOVA SCOTIA.

In the absence of Prof. Faville I am requested by our Gardener, Mr. Martin, to report to you upon the success of the "Lemon Oil" as an Insecticide. He finds it perfectly efficacious in destroying all kinds of Insect life in the Greenhouse, without apparently injuring the plants in the least. Outside I myself tried it on a large cluster of Caterpillars of the "Villeda Lappet Moth" on a young Elm, a slight sprinkling with a syringe was applied and in less than an hour they were all dead. In this case I found it more speedy and effectual than Kerosene Emulsion and I consider it a valuable Insecticide for all tender plants in Garden and Hothouses.

R. W. STARR,
Asst. Sec. Fruitgrower's Association.

BELLEVUE, HALIFAX, NOVA SCOTIA.

In reply to your enquiry re "Lemon Oil Insecticide" I have great pleasure in stating that I have found it the most effectual and safest I have yet used and would strongly recommend it to my fellow Gardeners.

W. E. BURKE,
Gardener to Genl. Montgomery Moore.

LEMON OIL INSECTICIDE.

ADMIRALTY HOUSE,

HALIFAX, NOVA SCOTIA.

I have great pleasure in bearing testimony to the great qualities of "Lemon Oil Insecticide." I find it quite safe to use on the most delicate foliage and it does work far more effectually than any other Insecticide which I have yet used.

W. LOW,

Gardener to Admiral Erskine.

SOME ENGLISH OPINIONS.

THE GARDENS, GLOSSOP HALL, DERBYSHIRE.

The experiments I have made with your "Lemon Oil Insecticide" have fully convinced me that it stands second to none as an eradicator of the many insect pests with which the Gardener has to contend.

B. ASHTON,

Gardener to Lord Howard of Glossop.

THE NURSERIES, CHILWELL, NOTTS.

We have been using "Lemon Oil Insecticide" on all kinds of plants and like it better than any Insecticide we have yet tried.

Yours faithfully,

J. R. PEARSON & SONS.

THE GARDENS, CHOLMONDELEY, CASTLE, MALPAS.

I have used your "Lemon Oil" for some time now and find it is most effectual and safe, destroying every insect it comes in contact with, as well as having such cleansing properties. I consider it the best Insecticide in the market.

CHARLES FLACK,

Gardener to the Marquis of Cholmondeley.

Important Hints on the use of Lemon Oil.

The cheapest and most effectual plan for destroying all insects and cleansing the plants, **when possible**, is by dipping. A man will thoroughly cleanse as many plants in one hour in this way as he could in several days by sponging. A number one pot with the drainage hole corked will be found a capital dipping vessel for ordinary sized plants. For larger plants a paraffin barrel with one-third sawn off will be found to answer the purpose. The Lemon Oil can be used for syringing without laying plants on their side as it acts as a fertilizer. Climbers can be syringed in any position and without the trouble of removing plants as the drip will not hurt the most delicate subject.

No washing with clear water is necessary after using this Insecticide. Soft water should always be used for mixing and warm water for Mealy Bug and Scale. If the liquid is left standing over night it will form a scum which should be carefully removed before it is again used. The Lemon Oil improves with age if the bottle is kept firmly corked.

PRICES:—Per Bottle, 25c.; per Pint, 40c.; per Quart, 75c.; Half Gallon, \$1.25; Gallon, \$2.25.

DIRECTIONS FOR USING LEMON OIL.

For Mealy Bug,— $\frac{1}{2}$ pint Lemon Oil to 4 or 6 qts. of luke warm water. When dipping for this insect the plant should remain in the liquid from 10 to 15 seconds, and kept in continual motion, when syringing, use the finest hose and apply the liquid with force.

For Brown and White Scale and Winter dressing of Fruit Trees, $\frac{1}{2}$ pint Lemon Oil to 4 quarts of warm water.

For Thrip, Red Spider, Mildew, Caterpillar, Black and Green Fly, $\frac{1}{2}$ pint Lemon Oil to 2 or 3 gallons of water.

For American Blight,—1 part Lemon Oil to 3 parts of warm water. Apply with a stiff brush and well rub into the crevices.

For destroying the Eucharis Mite,— $\frac{1}{2}$ pint Lemon Oil to 4 or 6 qts. of water, shake out the bulbs and immerse them in the solution for 3 minutes. Otherwise water the plants with the liquid 2 or 3 times at an interval of six days.

For destroying Ants,— $\frac{1}{2}$ pint Lemon Oil to 1 gal. of water. Well water their nests and runs several times in the course of a few days.

For destroying Insects, Curing Mange and all Skin Diseases in Dogs and all Animals,— $\frac{1}{2}$ pint Lemon Oil to 2 qts. of warm water. Well rub into the hide.

**SPRING
TONIC**

Simson's Chemical Food.

An old and valued remedy in every household. As a Tonic for weak and run down systems it has no superior. Women will derive the utmost benefit by using the Food when nursing, and for the special diseases of their sex, it has no equal.

Highly recommended for the cure of Nervousness, General Debility, Scrofula, and all other conditions consequent upon an impoverished state of the blood.

 None genuine without signature—"W. H. Simson, Ph.G." on the label in red ink.

W. H. SIMSON, Proprietor.

**Sovereign
CONDITION
POWDERS**

For Horses.

For Cattle.

For Poultry.

The Sovereign Condition Powders can be given with great advantage in all cases of Loss of Appetite, Stoppage of Water, Worms, Roughness of the Hair, Distemper, Botts, Heaves, Inflammation of the Lungs, Bowels, or Throat, and the many diseases to which the above-mentioned domestic animals are subject. As a Spring Medicine it is a great success in purifying the blood, and placing Horses and Cattle in a fit condition for work.

**Genuine
FLAVORING
EXTRACTS**

Recommend themselves for

Purity, Strength, Flavor.

In the manufacture of our Extracts only the best of material is used, and by our process of manufacture the full flavour of the fruits they represent is obtained. They are nearly three times as strong as ordinary brands. Our bottles are full size, and the price is just the same as that charged for low grade goods.

W. H. SIMSON, ORDNANCE DRUG STORE.

WHEN THE SYSTEM IS "RUN DOWN"

Through acute disease or by reason of continued ill health (from whatever cause) the best "builder" available to the sufferer—young or old—is "MALTINE WITH COD LIVER OIL." In this unique preparation is comprised every principle necessary to restore the wasted frame to the fulness of health. It is a brain and nerve food of inestimable value, a powerful digestant and assimilator of food, a "tissue-builder" and "bone-former." It is delicious as honey, and acceptable to the patient. One of England's greatest physicians (Dr. Fothergill), says:—"There is no remedy that can take the place of Maltine in cases of Debility and Nervous Prostration."
